

Levee - Aug. 21. Oct 18

My dear Mr. Watson

I am under many obligations for yours of 10th & also your determinations but as usual when something does not satisfy a point.

The little Chorizanthe or Chorizanthe must have been overlooked it's so small. I found very few specimens & as must say but perhaps here on say from this.

The Atriplex 1224 differs so much from A. Nuttallii as we have it commonly I think it must be separate. Full notes as are required, I think are given with the specimens.

I do feel somewhat regretted that Mr. Howard got the start of me so.

Cusick

"I wish it was all my own fault
for I collected my plants
almost as soon as he did but
neglected to send them on.

At of late years I have
felt more anxious to make
good specimens & get such
as may settle doubtful points
I have to get those that
we need & have no other
recourse. With best wishes
I am yours truly
Wm. C. Cress
